# MODULAR GP700

### MULTI-CHANNEL SWITCH PLUG-IN

DiCon's Multi-Channel Switch Plug-In offers accurate connection of one or two input fiber channels to a maximum of 16 output fiber channels. The Plug-In is designed for easy installation into DiCon's GP700M Modular Mainframe. DiCon's Multi-Channel Switch Plug-In can be built with Corning SMF-28, Flexcor 1060 or Polarization Maintaining Panda fiber.

#### FEATURES

- Very low insertion loss
- Low back-reflection
- Precise repeatability
- Flexible fiber types and wavelength ranges

### **APPLICATIONS**

Simplex 1xN Switches have one input aligned to one of N outputs. The components switch in one-channel increments. Duplex 1xN switches have two inputs aligned to two outputs. They switch in two-channel increments.

Blocking 2xN switches have two inputs aligned with only one output. The components switch in half-channel increments. Non-blocking 2xN switches have two inputs aligned with two outputs. They switch in one-channel increments.

FIBEROPTICS, INC

## SPECIFICATIONS<sup>1</sup>

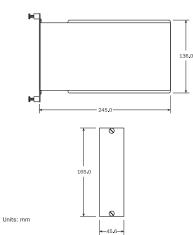

| Insertion loss <sup>2</sup>   |            | 0.6 dB typ., 1.0 dB max. |
|-------------------------------|------------|--------------------------|
| Back-reflection               | singlemode | -55 dB max.              |
|                               | multimode  | -20 dB typ.              |
| Repeatability 3               |            | ±0.02 dB max.            |
| PDL <sup>4</sup>              |            | 0.05 dB max.             |
| Cross-talk                    |            | -80 dB max.              |
| Extinction ratio <sup>5</sup> |            | 18 dB min.               |
| Durability                    |            | 10 million cycles min.   |
| Switching time                |            | 620 ms max.              |
| Optical power 6               |            | 300 mW max.              |
| Operating temperature         |            | 0°C to +40°C max.        |
| Storage temperature           |            | -20°C to +60°C           |
| Humidity                      |            | 40°C/90%RH/5 days        |

1. All specifications referenced without connectors. 2. 1.2 dB max. for multiple wavelength ranges.

- Sequential repeatability for 100 cycles at constant temperature after warm-up.
  Singlemode only. Measured at 1550 nm.
  Corning Panda PM 1300 fiber type only.

High power version (2W) available as special order.
